

eSEE-N-READ™ Home Version

electronic **READING AND INSTRUCTION TOOL** Features and Benefits

All of the benefits of the **SEE-N-READ® READING TOOL** (and more) right on your PC!

Features	Benefits
eSEE-N-READ™ Window Features	
<ul style="list-style-type: none"> Re-size window to any size 	The Window can be re-sized to fit various work requirements, from small to full-screen by just click-holding the Window edge and dragging to the size you want (for Full-Screen, just one click).
<ul style="list-style-type: none"> Click and Move functionality 	Move the eSEE-N-READ™ Window anywhere on your screen just by click-hold on the Window and dragging it.
<ul style="list-style-type: none"> Window-As-Cursor functionality 	Causes the entire Window to act like the mouse cursor...great for moving from place to place on pages. Switch back to READBAR™ (see below) movement just by right-clicking, then "Customize" or press an enabled hotkey (F5).
<ul style="list-style-type: none"> Full-Screen Mode 	Covers the whole screen with the Window. Only the READBAR™ (see below) moves up and down the screen using the mouse or arrow keys. When the bottom (top) of the screen is reached using the arrow keys, the READBAR™ automatically "wraps" to the top (bottom) of the screen
<ul style="list-style-type: none"> Horizontal or Vertical Mode 	The Window can be changed between vertical and horizontal shape with a couple of clicks and dragging the mouse.
<ul style="list-style-type: none"> Maximize, Restore or Minimize Mode 	Controls for the Window are located at the top right of the eSEE-N-READ™. The icons for the controls only appear when the cursor hovers over the control. This helps keep the graphics from interfering with reading. The icons fade back to see-through shortly after the cursor is moved.
<ul style="list-style-type: none"> Icon in MS Window Tool Tray 	Window drops into the MS Windows Tool Tray and shows the eSEE-N-READ™ icon. Double clicking the icon restores eSEE-N-READ™ on the screen.
<ul style="list-style-type: none"> ExplainIt Button 	(left of the max/min controls) creates an explanatory popup about each feature
<ul style="list-style-type: none"> Non-Glare Transparent Window 	Window Transparency can be adjusted with a few clicks to darken or lighten the shading of the Window depending on monitor requirements, lighting conditions or personal preference
<ul style="list-style-type: none"> Automatically Saves All Changes 	eSEE-N-READ™ automatically saves changes, but this behavior can be turned off, including minor issues like <i>not</i> remembering size, or always opening in the center of your screen
eSEE-N-READ™ ReadBar™ Features	
<ul style="list-style-type: none"> Clear viewing area 	On the eSEE-N-READ™ Window, there is a <i>clear</i> rectangle called the READBAR™ . The text behind the READBAR™ is the information being highlighted and read
<ul style="list-style-type: none"> Move ReadBar™ while reading 	Move ReadBar™ during reading by using either the mouse or arrow keys. READBAR™ movement can be adjusted for both "travel" distance and speed when using arrow keys
<ul style="list-style-type: none"> Horizontal and Vertical Mode 	The READBAR™ can be changed between horizontal and vertical (columnar) alignment with a couple of clicks of the mouse.
<ul style="list-style-type: none"> Re-Size Mode 	READBAR™ controls change the READBAR™ to make it the right size, shape or location for the material being read by just right-clicking and selecting the "Resize READBAR™" or "Move READBAR™" options. Tip: if the resized window is already in the correct position, just touch an arrow key and the new size and shape will automatically be saved without any dialogs.
<ul style="list-style-type: none"> Push Pin Functionality 	When the PushPin (located next to the ExplainIt button) is pushed in, the eSEE-N-READ™ Window will remain on top of all applications. When the PushPin is out, eSEE-N-READ™ will appear in the Taskbar and Alt-Tab list, and will no longer stay on top of all of the windows.
eSEE-N-READ™ General Features	
<ul style="list-style-type: none"> Three Level Help Mode 	eSEE-N-READ™ <i>Help</i> provides a choice of three "levels of detail" for on-screen Help information
<ul style="list-style-type: none"> Self-Paced Tutorial 	A full tutorial is built into eSEE-N-READ™ for easy learning of the application
<ul style="list-style-type: none"> Minimizes to MS Window Tool Tray 	Minimize eSEE-N-READ™ to the taskbar instead of the tool tray
<ul style="list-style-type: none"> Compatibility 	Works with any PC and has been successfully tested and used with interactive white boards and PC driven projection devices
